

POTTERS LEISURE

Norfolk Coast, United Kingdom

SYSTEM**ARDEX**
PREMIUM PERFORMANCE

ARDEX K 15 was chosen to provide a flat, level floor at the superb new indoor bowls facility at Potters Leisure, a family owned chalet hotel on the Norfolk coast, UK.

Forming the centrepiece of a new multi-million pound 3000m² extension, the bowls facility has been designed as a potential venue for national televised competitions. Potter's estate surveyor consulted ARDEX for advice on achieving the perfect finish essential for the project.

Self-levelling Ardex **K 15** was used to produce a very flat surface which, together with the rapid hardening properties, allowed the final floor covering to be laid with the minimum of delay.
