

WHAT MATTERS IN GOOD TPO WARM ROOF SYSTEMS?

Warm roof options offering light weight, space saving and cost-effective solutions are becoming an increasingly attractive way of achieving the increased H1 insulation requirements.

A waterproofing system is key to provide a warm roof with its attributes.

- Ultraply TPO proven performance over 25 years (historical Firestone brand)
- Durable – UV resistant and weathering tested
- Full solution – adhesives and accessories
- Sustainable – EPD available on ARDEX website, extended service life and easy to repair
- In use in New Zealand
 - Papamoa Surf Club
 - YMCA New Plymouth

TECHNICAL SUPPORT

Not only are you supported locally by the ARDEX technical services and specifications team, we also have direct access to the entire technical team at Elevate. No project is too small or too large to develop a complete solution. Where required we can also produce site specific reports in terms of achieved R-values, wind uplift resistance and installation requirements to accompany your specification documents.

ARDEX WARRANTY

ARDEX provides a comprehensive warranty programme. Discuss with your local specification manager what we might be able to provide for your project, whether it be an industry standard warranty or a SystemARDEX warranty, through to platinum. ARDEX is able to tailor a warranty package to your clients satisfaction. Terms and Conditions apply.

ARDEX INSTALLER NETWORK

ARDEX and Elevate have invested significant resources into upskilling our applicator network on latest application techniques. ARDEX continue to run refresher courses monthly and on an bi annual basis an Elevate Master Contractor visits New Zealand to conduct week long training. It is important to use contractors familiar with the correct application techniques that specialise in TPO Membranes.
