
ARDEX DS 70

IMPACT SOUND REDUCTION AND DECOUPLING SYSTEM

SYSTEMARDEX
PREMIUM PERFORMANCE

TURN DOWN SOUND, TURN UP COMFORT.

Whether it is the 2nd floor, or the 42nd floor, impact sound insulation is not just a requirement, but something that adds immense comfort to living spaces. ARDEX impact insulation systems allow that comfort, and the peace of mind in knowing the performance, compatibility and durability of a tested solution.

ARDEX DS 70 is a high performance soundproofing matting for insulating against footfall and impact sound. And in conjunction with moisture barriers, floor preparation, adhesives, waterproofing and other finishing products it can create a full flooring system that is suitable for any project.

Being made from recycled rubber, ARDEX DS 70 is an economical, yet high performing soundproofing option for use in residential and commercial applications underneath ceramic and stone tile and luxury vinyl tile. It also ensures that the finished flooring is isolated from any movement or cracking in the substrate.
