

ARDEX UD 150

THIN-LAYER UNDERTILE DRAINAGE MAT

ARDEX UD 150 is a thin, mesh-reinforced plastic, drainage mat for use under directly adhered tiled surfaces. A 6mm drainage channel allows the free passage of water underneath the tiled surface which speeds up drying after rainfall and reduces the likelihood of efflorescence build-up. ARDEX UD 150 is loose-laid over the membrane which separates the tiled surface from any movement in the substrate.

Benefits

- Shortens drying times after rainfall
- Allows fast drainage of water
- Reduces likelihood of efflorescence
- Allows fully adhered ARDEX tiling system
- Allows grout joint between tiles
- Accessible waterproofing layer
- Provides up to 16dB improvement in impact sound reduction

Use

- Under directly-fixed external tiled finishes
- Decks with internal gutters
- Decks with metallic profile finishes

Location

- External application

Substrates

Fully waterproofed substrates including;

- Concrete
- Screed
- Plywood
- Compressed fibre cement sheet

Size

Sheets of 1.02m x 1.96m x 9mm (2m²)

Packaging

Carton of 8 sheets

Code

30322
