## SECTION 11 Toxicological information

### Information on toxicological effects

**Ardex WPM750 Undertile Butynol**

<b>Inhaled</b>	Not normally a hazard due to non-volatile nature of product Inhalation of vapour is more likely at higher than normal temperatures. The vapour from heated material is discomfoting to the upper respiratory tract
<b>Ingestion</b>	Not normally a hazard due to physical form of product.
<b>Skin Contact</b>	Skin contact does <b>not</b> normally present a hazard, though it is always possible that occasionally individuals may be found who react to substances usually regarded as inert.
<b>Eye</b>	Not normally a hazard due to physical form of product.
<b>Chronic</b>	The additives are immobilised in the rubber and do not present a hazard during handling at room temperatures. Long-term exposure to the product is not thought to produce chronic effects adverse to the health (as classified by EC Directives using animal models); nevertheless exposure by all routes should be minimised as a matter of course.
